

Military Aviation Vaccine Adverse Reaction Survey Results

July 9, 2022

From January 6, 2022 to July 6, 2022, I conducted a voluntary and anonymous survey. The intent was to provide candid feedback to Military Commanders and associated safety centers on the risks now present within our formations. Many of these service members' concerns have been largely ignored by medical personnel; others are unwilling to report their issues for fear of losing flight status. The survey was completed online and all participants remained anonymous unless they chose otherwise. 50 responses were collected. Below are the summarized findings.
